

**Draft Programme for OOPSLA 2003 workshop**  
**Process Engineering for Object-Oriented and Component-Based Development**

08.30-09.00 **Introductions and Agenda**

09.00-09.45 **Keynote**

**Motoshi Saeki:** CAME: The First Step to Automated Method Engineering

09.45-10.00 Coffee break

**Papers**

10.00-10.45 A reference model for process-oriented software development organizations  
by J.M. Fernandes and F.J. Duarte (Portugal)

10.45-11.30 Process engineering for object-oriented and component-based development  
by C. Jobson (Sweden)

11.30-12.15 An overview of the RUP as a process engineering platform  
by B. MacIsaac (Canada)

12.15-13.00 Practicalities of implementing component-based development and model-driven architecture  
by J. Bettin (New Zealand)

13.00-14.00 Lunch break

**Discussion**

14.00-17.00

The afternoon session will be devoted to breakout study groups to discuss issues raised in the keynote and the presented papers.

Note that data projectors will be available to connect with your laptop.
